COMPLIANT OUTBOUND E-INVOICES

GLOBAL E-INVOICING SOLUTION ADAPTED TO EACH COUNTRY´S CURRENT TAX LAW.

edicomgroup.com

E-INVOICING
Introduction

An **invoice has clear fiscal attributes** beyond its role as a key document in any business relationship. **Each country has specific invoicing legislation in place**, which plays an important part in government revenue generation through taxation.

These **legislations** put particular rules in place with regards to the electronic format of these invoices. Special care and heightened compliance are necessary to ensure invoice **integrity and authenticity**.

E-invoicing provides a higher degree of security than paper-based document management. As data processing and information transfer technologies develop, minor technical obstacles that existed initially, have been gradually disappearing.

The use of the e-Invoices has become so widespread, and has gained such popularity that now there are countries **that require and mandate its use**.

COMPLIANT E-INVOICING
Key factor

EDICOM offers advanced e-Invoicing solutions for companies worldwide. We manage a **permanent e-Invoicing Observatory** through which we guarantee the validity and compliance of our solutions by incorporating the requirements of each country based on our client's needs.

Our platform has the **required accreditations in each country in order to be aligned with the current legislation** in each case. It is a cloud-based platform ready to integrate with any information system, offering different management environments adapted to each user's features.

▶ **Advantages**
Increased efficiency in administrative processes, reduction in costs, less time sending and collecting on invoices, increased security for your commercial transactions, automation of the processes of reception and integration of invoices...

WHAT ARE
Compliant Outbound e-Invoices?

Under the "Compliant Outbound e-Invoices" designation, we provide a **set of services and solutions** accessible through the "EDICOM Platform" for the **issuance of electronic invoices adapted to the tax regulation currently in force in any country worldwide**.

"Compliant Outbound e-Invoices" provides businesses with a **centralized solution, relieving them of the complexity** associated with ERP data adaptation, as well as fiscal-technical compliance.

The solution is designed to be integrated with the company management systems, allowing the issuance of any e-invoicing schema (XML, EDIFACT, X12, etc.) transparently.

Through this solution, it is possible to create multiple working environments tailored to the particular needs of different user groups and country of origin.

Electronic Invoicing in the European Union.

e-Invoicing is being set as mandatory in the relationships with Public Entities as a means of improving its communications and the management of supplier payments.

Within the European Union, there are multiple e-Invoicing formats that can be exchanged with the Public Administrations.

Electronic Invoicing in Latin America.

Almost all Latin-American countries use mandatory e-Invoicing systems based on fiscal control with the corresponding tax authority. This is a trend that continues to grow in the rest of the countries of the region.

POWERING
e-Invoicing Compliance

The solution **is designed for international companies** with branches or subsidiaries in different countries affected by e-Invoicing legislation.

Through "Compliant Outbound e-Invoices", EDICOM can implement **advanced projects for issuing legally valid e-Invoicing**, automating the entire process thanks to the platform's capacity for integration with their internal management systems.

Compliant Outbound e-Invoices
EDICOM

Simplifies the process of adapting your billing to the legislation in any country where you operate.

COMPLIANT OUTBOUND E-INVOICES
How it works

The EDICOM platform sets up an environment for **each invoice-issuing country** subscribing to its tax authority.

EDICOM works along with you to prepare a unique data interface to **integrate your management systems with the EDICOM platform**. This way, every time a user in your organization issues a bill in your in-house management system, the interface comes into play to automate issuing of the e-Invoices.

The EDICOM platform **recognizes the invoice issuing country**, redirecting it to the environment configured for processing according to each country's specifications.

The EDICOM platform transforms the data from the ERP into the **e-document schema required in each country** (XML, EDIFACT, X12, and others).

EDICOM **automates signature of the invoices**, as well as communications with the tax authorities when online tax returns or the application of particular validations are required.

The invoice created is stored in EDICOMLta (Long-term Storage Service), which **ensures legal safekeeping of all the documents stored throughout their term**, in accordance with the technical specifications of the different international standards, or the local legislation of each issuing framework, where indicated.

The duly **validated document is forwarded to the recipient through EDICOMNet**, the EDICOM multiprotocol private network.
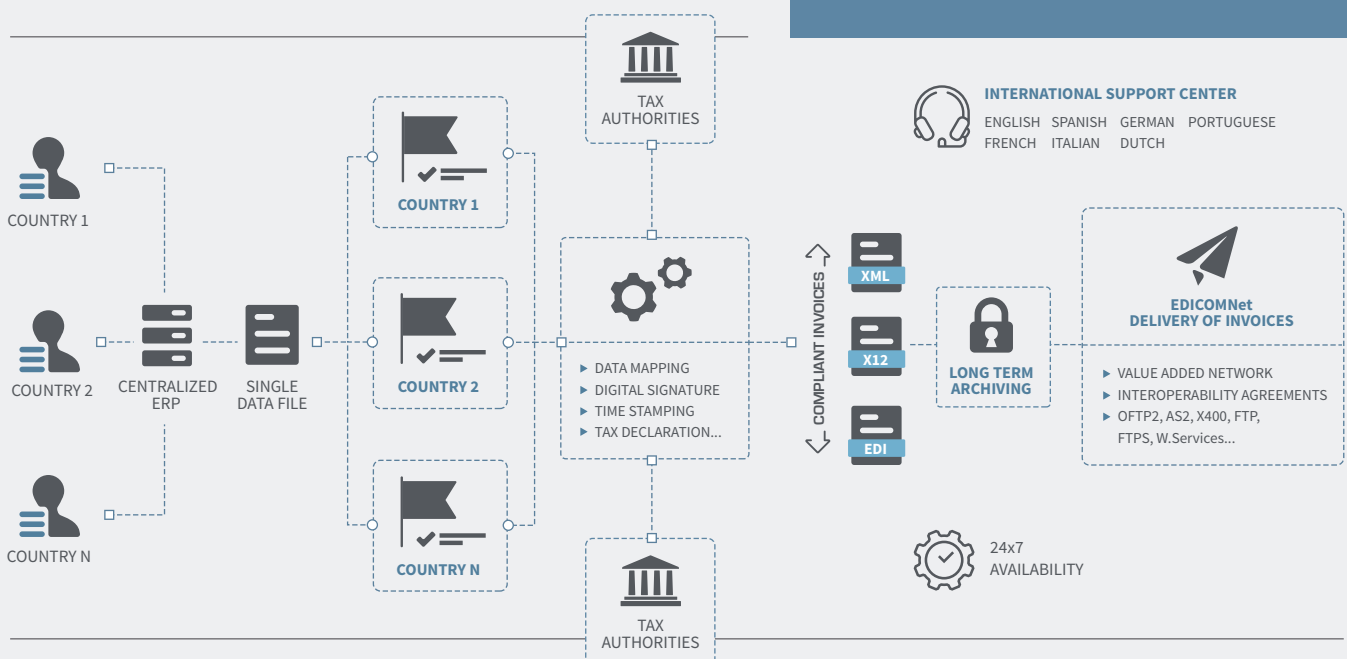

Why EDICOM?

We have been developing data integration and electronic invoice solutions since 1995, without diversifying our Core Business from our main activity.

Offices in 8 countries, active projects in more than 65 countries. We are a global company offering operational corporate solutions anywhere in the world.

EDICOM develops solutions in its own "cloud" by implementing a technology infrastructure in the operational cloud 24x7 with an availability commitment of 99.9%. Contracting any solution gives immediate access to an international support service that will attend to queries in up to 7 different languages.

We carry out active knowledge management that translates into immediate adaptations on our platform, ensuring its validity in time in accordance as new technical and legal specifications come into force.
