

WORLDWIDE FRIENDLY DATA INTEGRATION

E.D.I. | COMPLIANT E-INVOICING | VAT COMPLIANCE | iPaaS

edicomgroup.com

E.D.I.

Electronic Data Interchange

EDICOM operates its EDI electronic data exchange platform from a centralized and interoperable technology infrastructure under the most demanding data security, reliability and confidentiality levels. The EDICOM EDI B2B platform operates in more than 70 countries, offering all users a **cloud solution available 24x7 and featuring high integration capabilities** with any information system.

With EDICOM you can delegate all your EDI communications in a single technology partner to troubleshoot problems associated with **messaging services, communication protocols, electronic signatures** and more. Just tell us who you need to exchange EDI messages with and we'll take care of the rest.

COMPLIANT E-INVOICING

Key factor

We provide advanced electronic invoicing solutions in any country where you operate. We have a permanent e-invoicing observatory that ensures the validity of our **solutions across 30-plus countries in Latin America and Europe** and are continuously adding new regions on the basis of our customers' needs.

EDICOM Compliant e-Invoicing has the **accreditations required in each country to align with the laws** in force in each case. Our cloud platform is prepped for integration with any information system, affording different management environments adapted to the peculiarities of your users in every country where you work.

ISSUING SOLUTIONS

- ▶ **Compliant Outbound e-Invoices**
Issuing legal e-invoices in multinational environments.
- ▶ **Public Administrations**
Issuing e-invoices for European public administration suppliers.
- ▶ **Business@Mail**
Mass invoice dispatch with reception control and processing by recipients.

RECEIVING SOLUTIONS

- ▶ **Compliant Inbound e-Invoices**
E-invoice validation and integration in accounts payable.
- ▶ **Suppliers' Portal**
Procurements invoice uploading and integration via web portal.

EDICOM VAT PLATFORM

Global electronic compliance

Tax authorities have found data integration technologies to be a great opportunity to optimize their processes, streamlining the filing of tax statements.

Portugal, Spain, Italy, Czech Republic, Norway, Poland and Hungary have fostered processes normally focused on the **real-time issuance and dispatch of VAT information involved with company accounting.**

The EDICOM communications platform provides an efficient response to integrate your company's accounting information systems and adapt them to current VAT requirements in the different countries where you operate.

COUNTRIES WITH ELECTRONIC VAT SYSTEMS

Making Tax Digital (United Kingdom) , SII (Spain), SAF-T (Portugal) , SAF-T (Poland), RTIR (Hungary)...

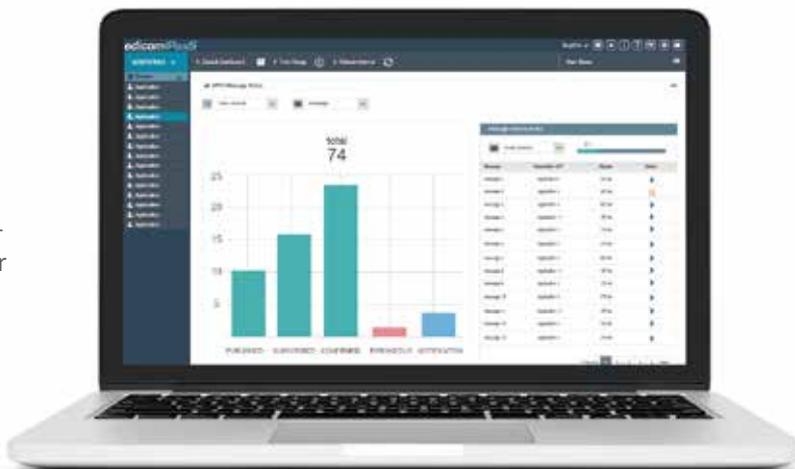

Download the “Global VAT Compliance” white paper and find out more about e-VAT in a global context.

EDICOMiPaaS

Integration Platform as a Service

With EDICOM iPaaS (Integration Platform as a Service) you can network all your management solutions using powerful tools available exclusively in service mode.

EDICOM iPaaS combines **data transformation and connectivity solutions to integrate all your IT infrastructure applications** (accounting, invoicing, warehouse management, CRM, etc.), whether stored in-house or on the cloud.

As an EDICOM iPaaS user you get a visual interface to monitor and administer all your integrations, although our work model is posited on a service that inhibits platform parameter setting, administration and control tasks.

A team of specialist consultants and managers will be responsible for implementing the production and monitoring of all the integrations needed to consolidate or sync your internal applications.

CONNECTIVITY

Configuration and programming of the connectors needed between applications in **Cloud2Cloud**, **On-Premise2On-Premise** and **Cloud2On-Premise** environments.

ALERTS

Alert tracking to secure the **continuity of the critical processes** defined in your application integration project.

DATA MAPPING

Implementation of the **data transformation processes** required for information exchanges among all your applications.

INCIDENT MANAGEMENT

We proactively upgrade our platform or reach out to you to **immediately settle any incident**.
